It is possible to interpret the data in a different way. For example, it is possible that the data are not representative of the population as a whole, but that they are representative of a specific group of people. This is possible because the data were collected from a specific group of people, and it is possible that the data are not representative of the population as a whole.

# **Suggested Minimum Resolutions**

When selecting a display for your TV's connection, use the TV's manual or call 1-877-826-6868 for more information. Resolution is the number of pixels (dots) that can be displayed horizontally and vertically on the screen. The higher the resolution, the sharper the image will be.
