### Funcionament general del servidor

El servidor està format per un conjunt de dispositius que inclouen la unitat de processament, la memòria i els dispositius d'entrada i sortida. Els dispositius d'entrada i sortida són els dispositius que permeten al servidor comunicar-se amb els dispositius externs. Els dispositius d'entrada i sortida són els dispositius que permeten al servidor comunicar-se amb els dispositius externs.

### Administració de les files de espera

La gestió de les files de espera és un aspecte clau de l'administració del servidor. Els sistemes d'administració de les files de espera permeten al servidor gestionar les sol·licituds dels clients i assegurar que aquestes són ateses de manera eficient i equitativa.

### Control de recursos

El control de recursos és un altre aspecte clau de l'administració del servidor. Els sistemes de control de recursos permeten al servidor gestionar els recursos disponibles i assegurar que aquests són utilitzats de manera eficient i equitativa.

### Seguretat

La seguretat és un aspecte clau de l'administració del servidor. Els sistemes de seguretat permeten al servidor protegir-se contra les amenaces externes i internes i assegurar que la informació que es processa és segura.
